VDS Guidelines and Survey Responses

The survey was distributed between the 24th April 2012 and the 27th April 2012 with the Survey Return Date being 12th May 2012, which represents the baseline date for all views expressed. The survey was completed within the context of the on-going public consultations for the generation of the Local Development Framework documents by Braintree District Council in response to the NPPF.

This survey provides an insight into the views of the parishioners of Great Maplestead and as such, the desirability, or otherwise, of living in a rural parish with its lifestyle and environment. The guidelines are derived from the responses to questions that the parishioners have placed weight on or are high impact questions, over and above the usual Essex Design Guidelines and BDC planning policy.

Survey type	Distributed	Returned	Return rate
Adult	273	250	91%
Youth	32	24	75%

Below is a summary of the results, which allows the parishioners quantified majority views to be understood and to help establish the representative nature of statements made.

The Guidelines

	Guideline	Evidential cross references
GM1	Developments should only be permitted where it does not detract from the rural nature ² of the Parish and the farming and countryside landscape	Q1(a), Q1(b) Q1(c), Q4
GM2	Ensure farming is a continuously supported business by appropriate implementation of local planning policy	Page 13 Q1(a)
GM3	 Ensure the following facilities are retained for community use and social value: 1. Village hall 2. Village playing field 3. Church 4. School playing field 	Page 4,5 Q1(b) Q1(c) Q1(d)
GM4	 Maintain and preserve the character, for leisure use of the: 1. Countryside lanes 2. Footpaths 3. Bridleways 	Page 11,13 Q1(c) Q2, Q4
GM5	 Retain the village shape and structure with regards to: Spaciousness, i.e. avoid disproportionate cramming of new dwellings Architectural features in the specific character areas, as can be assessed from the character area descriptions and the Parishioners views with regards to building features as expressed in GM28,29,30 and 31 Linear development style Open and green spaces 	Page 14 to 31 Q15, Q16 Q17, Q18 Q12(a) Q12(b)

² The 'rural nature' relates to the specific countryside / country life attributes of Great Maplestead as described in 'Introduction', 'Landscape Character' and 'Countryside' sections

GM6	 Retain public access for their visual characteristics and enjoyment to the following green spaces: 1. Village playing field 2. School playing field 3. Churchyard 4. and accessible fields, woods and copses (via footpaths) 	Q2
GM7	The currently protected spaces of the churchyard and village playing field should be retained and the school playing field should be added to the protected list at the earliest opportunity	Q2
GM8	The unique local landscape character of Great Maplestead associated with the conjunction of the three landscape character areas of the Colne River Valley, the Yeldham Farmland Plateau and the Wickham Farmland Plateau should be emphasised and retained, in particular the important views from the village overlooking the countryside beyond must be safe guarded	Page 11 to 13 Q3
GM9	Ensure that the listed buildings are maintained and their surroundings form a suitable setting for their historic nature	Q5
GM10	Identify and implement suitable methods to reduce the speed of traffic in appropriate areas	Q6, Q8 Q20/Q21
GM11	Take action to:1. Restore and maintain the road side verges and grass triangles2. Prevent future damage to the verges and grass triangles	Q8
GM12	Refrain from the introduction of further:1. Street lighting, i.e. retain the 'dark sky' approach2. Pavements	Q6, Q7, Q8
GM13	Avoid the installation of visually intrusive infrastructure items such as overhead National Grid cables with associated pylons, transformers, mobile phones masts in the Parish	Q7
GM14	The installation of high speed fibre optic broadband is a high priority and should be encouraged	Q8
GM15	The provision of more off-street parking by the residents of Church Street, if so desired by those residents, should be supported	Q8
GM16	The provision of mains gas should be considered	Q8
GM17	Allotments space should be provided if requested by any resident	Q8
GM18	There may be some support for a small amount of residential development which should be restricted to infill sites within the development boundary on which 2-3 bedroom family houses would be preferred	Q10(a), Q10(b), Q12(a)
GM19	If a local need is demonstrated there may be some support for a small amount of affordable housing development	Q10(b)
GM20	All developments should be within the village development boundary unless rural exceptions apply	Q12(a)
GM21	The Parishioners opinion has indicated that more than 6 additional properties, within the development boundary, would be detrimental to village character	Q9
GM22	New retail, office and commercial premises should not be encouraged except in the case of redundant farm buildings where conversion to other uses should be permitted in accordance with national and local planning	Q11

VDS Guidelines and Survey Responses

GM22 (cont.)	policies for the rural economy. This should be conditional that the new business use is in keeping with the rural character and infrastructure of Great Maplestead			
GM23	Any development within the development boundary should be restricted to infill sites	Q12(a)		
GM24	In submitting / assessing any planning application, the appropriate section of the Great Maplestead VDS report should be consulted with reference to the Parish needs and the local character, history and materials adjacent to the proposed development site together with the VDS report guidelines			
GM25	Developments must be sympathetic with and compliment the character of the immediate surrounding area particularly with regard to: 1. Scale 2. Density 3. Design	Q12(b)		
GM26	In any development of more than one dwelling, consideration should be given to using different building styles and designs, dependant on site characteristics	Q12(b)		
GM27	In any development of a single dwelling, it should have a style that sympathetically integrated with existing properties around but may vary from that style			
GM28	Alterations to existing buildings should be sympathetic with the style of the building being altered and the surrounding buildings			
GM29	For roofs, traditional materials such as slate or clay tiles and thatch are considered desirable and should be encouraged			
GM30	The exterior finishing of the walls of buildings, with weatherboard, red brick, Essex rendered plaster and flint are all well regarded and should be encouraged			
GM31	Encourage the use of traditional window and door materials where appropriate to the building and area under consideration	Q17		
GM32	 Encourage the use of boundary features such as: 1. older 'recycled' brick walls, flint walls 2. or softer features such as ornamental hedges, wooden picket or hurdle type fencing 			
GM33	Agricultural field hedging should be retained	Q18		
GM34	Ensure that the visual aspect of any renewable energy infrastructure is fully taken into account to avoid unsightly placement			
GM35	Consider the use of HGV / weight or similar signage to restrict HGV vehicles except for access to local farm, business and residents services			
GM36	Consider implementing single track road signs on narrow lanes	Q20/21		
Other vie	ews expressed			
Retain th	e 'hail and ride' bus facility	Q20/21		
Ensure th	nat glass recycling facilities are retained and are user friendly	Q27		

The Survey Responses

The guidelines have been derived from the majority parishioner views as expressed in the survey.

The survey results were presented to the parishioners at an open day meeting in the village hall on the 15th September 2012 and also made available on the VDS website:

http://www.essexinfo.net/GreatMaplestead_vds/

A printed copy was placed in St. Giles Church.

The results are generally presented in the form:

- 'Question number' and 'the question asked', for example, '1(a). Does the following contribute to your enjoyment of living in Great Maplestead'
- The questions are then broken down into separate sub-questions where specific areas are considered, for example 'rural nature'
- The pie chart of those who expressed a view (with the number in each sector). In the case that there are two sectors with low votes and the normal format causes an overlap of numbers, the 'disagree number is to the upper left of the strongly disagree which is placed nearer the centre of the chart. When no votes are cast for the option, '0' votes are not shown
- A brief commentary of the results

The derived guidelines are from the majority views and are presented in the previous section pages 32 to 34 inclusive ('Guidelines').

The general format of the survey responses is a pie chart with the number of votes for an option in the 'strongly agree' or 'agree' or 'disagree' or 'strongly disagree' categories.

The legend for the pie chart colours (except for one specific question (Q9) which has its own legend) is as follows;

🖀 I Strongly Agree 🛛 📓 I Agree 🔤 I Disagree 🔤 I Strongly Disagree

The legend generally used for the pie charts

Living in and Enjoyment of Great Maplestead

Q1(a). Do you agree or disagree that the following Contribute to your Enjoyment of living in Great Maplestead (countryside)? Countryside / open spaces Rural location and Mixture of farming and Varied landscape / setting character residential areas character areas 148 173 186 190 The countryside, rural character and landscape are all major contributors to Great Maplestead as a Parish. The farming element, as an integral feature of the settlement and its contribution to the character, is well regarded

Q2. Do you agree or disagree that the following green spaces are important? Churchyard Fields Footpaths Village playing field School playing field Woods and copses The grass triangles							
49 1 191	46 194	49 1 192	50 1 189	59 4 167	48 1 190	73 163	
The green spa view.	aces are highly	important featu	ures in the villag	ge character. Wi	ithout exceptio	n a strong	

VDS Guidelines and Survey Responses

Q4. Do you agree or disagree that the country lanes, verges and hedgerows are important?					
Average for all categories(i) to (v)	They are important for walking, (i). both generally and for (ii).dog exercising, (ii). personal exercising, (iv).horse riding and (v). providing a wildlife friendly environment				
67 1 159	There is a very strong view that the countryside nature of the lanes is valued for a variety of activities and reasons				

Roads and lane capacity	Access to transport links	Noise levels	Traffic density	Traffic speed
22 51 93 55	17 49 95 66	47 1027	28 35 41 120	51 83 92
Artificial lighting	Sewage treatment capacity	Lack of street lighting	Lack of pavements	Verge erosion
39 36 26 123	25 51 87 47	80 20 22 103	46 24 30 123	47 65 103

substantial majority identify these issues. Noise levels, lack of street lighting and lack of pavements are not regarded as a problem by a substantial majority. There is a balanced comment on road capacity, sewage treatment and access to transport links with no strong view. Artificial lighting is generally regarded as not a problem

lighting, other large electrical infrastructure and mobile phone masts. Boundary features such as high boundary fencing and extensive hard-paved driveways have a balanced response. The less urban style wooden telegraph poles are supported by a majority. Satellite dishes and security lighting are not generally regarded as intrusive

Q10(a). Do you agree	Q10(a). Do you agree or disagree that additional housing is needed?						
No new housing is required							
22 69 34	The majority consider there is no need for new housing according to their perception of local need. However, there is a significant minority who consider there is a local need						

Q10(b) if so what type of housing?							
Single person homes	2 bedroom family homes	2 - 3 bedroom family homes	3 - 4 bedroom family homes	Sheltered accommodation	Affordable homes		
66 26 61	50 14 53 37	46 20 25 75	61 11 46	59 12 59 56	59 34 28 58		

For those who consider housing is needed, this establishes what type of housing is needed. The two types with majorities are 2 to 3 bedroom family homes and affordable homes. There are substantial majorities that consider single person homes, 3 to 4 bedroom homes and sheltered accommodation for the elderly are not needed to meet local needs

Q11. Do you agree or dis	sagree that the following p	remises should be provide	ed?				
Retail premises	Office / business space	Small industrial units	Business premises by the conversions of agricultural buildings				
77 21 55 72	90 532 99	107 ⁵ 28 89	76 17 66 71				
The majority view is that business premises should not be provided. Of special note is the view against the conversion of non-redundant agricultural buildings, this reflects the strong parishioner views that farming is an integral activity to the village and is to be retained							

Planning

Q12(a). The <u>shape</u> and s statements?	tructure of Great Maplester	ad, do you agree or disagre	ee with the following			
The Development boundary should be retained within its current boundary	Within the Development boundary, developments should be allowed on infill sites	Within the Development boundary, developments should be allowed on backfill sites	Current open spaces and countryside views should be retained			
48 141	48 31 45 100	75 17 69 59	36			
	There was a substantial view that the village envelope should be retained. Any permitted development should be focused on in-fill sites as opposed to backfill sites, thereby retaining the linear character of					

the village. Open space and countryside views retained

Q12(b). The shape and structure of Great Maplestead, do you agree or disagree with the following statements? New properties should New properties should be Any new development Building alterations should vary in style sympathetic with their should retain the be in accordance with the immediate housing density style of the building surroundings 113 140 167 The view is that any new properties should vary in style but retain sympathy with their surroundings and be in proportion to the immediate housing density.

Q15. Do you a	Q15. Do you agree or disagree that these roof features contribute positively to character?						
Chimney & chimney pots	Pitched roof lines	Pitched dormer windows / porches	Clay peg tiles	Slate tiles	Thatched roofs		
2 101	126 90	123 81	92	22 ² 69 130	107 104		
Of the roof feat	ures highlighted al	I were acceptable	as alternatives. P	itch roof lines are	preferred.		

Q16. Do you agree or disagree that these wall features contribute positively to the character?			
Weatherboarding	Red brick	Rendering / Essex Plastering	Flint
27 ⁹ 60 126	16 2 73 135	76	18 120 88
The wall features varying from weatherboard through red brick plastering and flint were all regarded as positive features			

Panelled wooden frame		UPVC	Wood	Wooden framed	
70		52 11 65 86	12	79

			lls, ornamental hedge ve boundary features.		
hedging is well rega		s gardens are effectiv	e boundary realures.	Agricultural	

Q19. Do you agree or disagree that attention should be given to the visual impact on the Parish?		
Solar panels on roofs	Solar panels on the ground	Wind generators
25 34 88	38 70 90	21 24 83 92
The view is that consideration should be given to the visual aspect of alternative energy sources		

The street signage	A hail and ride bus service v's bus stops	Traffic calming bumps	Village 'gateways'
12 61 152	41 87 87	75 18 32 100	32 24 75 80
nsuitable for HGV signs	Vehicle weight restriction signs	Single track road signs	One way signs
16 43 87 79	51 75 73	13 52 93	39 19 44 99

Design Features

The current street signage is considered appropriate. The hail and ride bus service is well regarded. Traffic calming bumps and one way signs are not required. Single track road signs and HGV restrictions are considered desirable for the narrow lanes. The requirement for on-going farm vehicles usage would need to be accommodated to support the agricultural character of the Parish

General Information

The most used facility is the glass recycling followed by the village hall

Youth Questionnaire

Out of the 32 questionnaires, 24 were returned by 9 males and 15 females. 23 were in full time education and 18 have lived in the Parish for 11-17 years. Generally the youth and adult responses were similar.

Green spaces (24 yes 0 not) and rural nature being equally important (22 yes 2 not). The youth community was less certain that the village was a vibrant (15 yes 9 not) and thriving community (13 yes 10 not) and more considered that transport links were a difficulty (17 yes 4 not).

There was less concern with the visual impact of solar panels (11 yes 11 not) but more keen on pavements (13 yes 8 not) and traffic calming measures (13 yes 11 not).

Production and Acknowledgements

• This document was produced in two phases, the first in 2008-2009 and the second in 2012-2013

• A key element to the Great Maplestead VDS was a strong desire that the parishioners views be reflected in this document and the views presented are the majority views as evidenced by the survey results

• Public meetings were held by the VDS Committee at which the VDS process, the reason for the survey and the use to which it would be put were explained and comments and questions from parishioners were received

• This was assisted by expert advice provided by a representative of the RCCE and BDC Planning Department

• The anonymous nature of the questionnaire was regarded as an important element and this was preserved all through the process. A professional company specialising in data analysis was used to generate the results

• The results were presented at an open day in the village hall on the 15th September 2012 and comments received

• The document was developed over the next year and reviewed at several village hall meetings

There has been considerable support to this enterprise by many parishioners and other parties who we thank. We especially note and thank the parishioners for their excellent response to the questionnaire and constructive observations who made this a truly representative document.

The Great Maplestead VDS committee wish to thanks all those who have contributed either time, resource or funds to help this happen.

The committee members for the second phase and production of this final document were: Bill Bowers, Jean Bowers, Julie Breed, Mary Elms, Chris Hunnable, Paul Knight, Simon Last, David Money, David Oakes, Kevin Surgett, Peter Faulks and Francis Mortlock as a co-opted member to be called upon if required. Clr. David Turner, was the Parish Council representative monitoring the process, progress and community engagement.

Mr Bob Newman	Proof reading
The printers	Production of the document

At the start of this activity, the Village Flower Show hosted a photographic competition, both adult and junior categories to 'Capture the Character of Great Maplestead'.

Some of those photos are used in the 'Images of Great Maplestead' section with other photographs of the Parish taken on the character assessment day or later updates.
